

Dear Sir: For years now public radio has gone straight into the corporate toilet, commercial radio owned and operated by a few national conglomerates with a monopoly and political agendas outside the true public interest. That has dominated the airways with corporate trash. I pay a fee to XM radio to get away from your interference with what I hear and finally I have enjoyed radio again so please do the American people a favor and keep your political and corporate cronies away from my XM and all Satellite radio companys. Thanks John Devlin
